OK. Bill, can you provide the monthly reports?

I would rather see the monthly reports with the data in the Aquatic Resources section of the SEIS, there is a place to discuss the chemical contaminants expected to be present near the site. In past SEIS's, I have used a combination of regional data and the chemicals of concern as defined by the specific NPDES permit to address this issue.

<<Example NPDES report.pdf>> Jeff:

Attached is an annual report prepared by the NJDEP regarding NJPDES compliance at OCGS. You had requested the last five years of NPDES reports. Does this type of report suffice? There is no actual data reported but rather whether or not the plant was in compliance for various parameters. Bill Maher indicated he could send us the monthly reports prepared by AmerGen. Each is about 30 pages long. Do you prefer those reports? I mentioned to Bill that we would also like the annual toxicity reports mentioned on page 2 of the attached report and he said he would send those as well for each of the 5 years.

Let me know your preference.

Kirk
