Subject: RE: Thallium

The thallium was found in a soil sample at a seepage pit associated with water treatment equipment. In the Non-Rad SI/RI (URSGWC 2000), it is described in section 5.21 (AOC-14C) page 5-19.

Thallium was also found in soil sampling of the dredge materials (Confined Disposal Facility), though only a slight exceedence of the standard (URSGWC 2000) page 5-42.

Subject: Thallium

Bill Maher wants to know where thallium is mentioned in the SI/RI report.
