

April 25, 2006

Mayor Jesse Stone  
City of Waynesboro  
628 Myrick Street  
Waynesboro, Georgia 30830

Dear Mayor Stone:

I would like to invite you, as a public official who may have an interest in activities related to the Vogtle Electric Generating Plant, to a series of meetings with representatives of the U.S. Nuclear Regulatory Commission (NRC). Southern Nuclear Operating Company (Southern) expects to file an early site permit (ESP) application with the NRC in August 2006 for two new reactors at the Vogtle site. In anticipation of this event, the NRC is taking early action to interface with the local Waynesboro community.

The NRC is planning to host two informational meetings. The first meeting, to be held on May 10, 2006, will provide an opportunity for NRC staff to provide state and local public officials with a background of the NRC, our mission, and the ESP review process. This occasion will also be a good time for you to pose any questions and/or raise any concerns to NRC staff. The following day, May 11, 2006, the NRC is inviting interested members of the public to a meeting to discuss the ESP review process and opportunities for public involvement. Public participation in the meeting is encouraged, and plenty of time has been allotted for questions regarding the NRC licensing and application review processes. In addition, the NRC will host two 2-hour open houses preceding the meeting to allow for one-on-one interaction between the NRC staff and attendees.

Under the NRC's regulations in Part 52 of Title 10 of the *Code of Federal Regulations*, "Early Site Permits, Standard Design Certifications, and Combined Licenses for Nuclear Power Plants," the NRC can issue an ESP for approval of one or more sites for possible future construction of a nuclear power plant(s). The issuance of an ESP is separate from the issuance of a license to construct or operate a nuclear power plant. The review of an ESP addresses site safety issues, environmental protection issues, and plans for coping with emergencies, independent of the review of a specific nuclear plant design. Should an ESP be issued for Vogtle, Southern could reference the ESP in seeking, at some time during the term of the ESP, a license to construct or operate a nuclear power plant(s) on the site.

J. Stone

-2-

The government-to-government meeting will take place on May 10, 2006, from 3:30 p.m. to 4:30 p.m., in Room Number 163 at the Waynesboro campus of the Augusta Technical College (ATC), 216 Highway 24, Waynesboro, GA. The public meeting will take place the following day, May 11, 2006, from 7:00 p.m. to 9:30 p.m., in the ATC Auditorium. An open house will precede this meeting from 5:00 p.m. to 7:00 p.m. In addition, there will be an open house from 12:00 p.m. to 2:00 p.m. on May 10, 2006, at the Burke County Library, 130 Highway 24 South, Waynesboro, GA.

Enclosed please find the public meeting notice. If you have any questions regarding the meetings, please contact Christian Araguas of my staff by e-mail at [cja2@nrc.gov](mailto:cja2@nrc.gov) or by telephone at 301-415-3637.

Sincerely,

*/RA/*

SUBJECT: FORTHCOMING MEETING TO DISCUSS THE REVIEW PROCESS  
FOR SOUTHERN NUCLEAR OPERATING COMPANY'S EARLY  
SITE PERMIT (ESP) APPLICATION FOR THE VOGTLE SITE

DATES & TIMES: Thursday, May 11, 2006

Open House:	5:00 p.m. – 7:00 p.m.
Formal Meeting:	7:00 p.m. – 9:30 p.m.

LOCATION: Augusta Technical College, Waynesboro Campus  
Auditorium  
216 Hwy 24 South  
Waynesboro, GA 30830

PURPOSE: To communicate with the public regarding the upcoming Vogtle early site permit, the subsequent review process, and opportunities for public involvement.

CATEGORY 3:\* The public is invited to actively participate in the discussions. The format of the meeting is specifically tailored for the public to comment and ask questions throughout the meeting.

PARTICIPANTS: Participants from the NRC include members from the Office of Nuclear Reactor Regulation (NRR) and the Office of the General Counsel (OGC).

NRC:  
F. Cameron, OGC  
D. Matthews, NRR  
C. Araguas, NRR  
M. Notich, NRR

OTHER

INFORMATION: Formal presentations will be preceded by a two-hour, informal "open house" from 5:00 p.m. to 7:00 p.m. for those who wish to attend. The open house will provide members of the public with an opportunity to talk informally, "one-on-one" with the NRC staff.

April 25, 2006

Mr J. B. Powell - State Senator  
228 Church Street  
Blythe, GA 30805

Dear Senator Powell:

I would like to invite you, as a public official who may have an interest in activities related to the Vogtle Electric Generating Plant, to a series of meetings with representatives of the U.S. Nuclear Regulatory Commission (NRC). Southern Nuclear Operating Company (Southern) expects to file an early site permit (ESP) application with the NRC in August 2006 for two new reactors at the Vogtle site. In anticipation of this event, the NRC is taking early action to interface with the local Waynesboro community.

The NRC is planning to host two informational meetings. The first meeting, to be held on May 10, 2006, will provide an opportunity for NRC staff to provide state and local public officials with a background of the NRC, our mission, and the ESP review process. This occasion will also be a good time for you to pose any questions and/or raise any concerns to NRC staff. The following day, May 11, 2006, the NRC is inviting interested members of the public to a meeting to discuss the ESP review process and opportunities for public involvement. Public participation in the meeting is encouraged, and plenty of time has been allotted for questions regarding the NRC licensing and application review processes. In addition, the NRC will host two 2-hour open houses preceding the meeting to allow for one-on-one interaction between the NRC staff and attendees.

Under the NRC's regulations in Part 52 of Title 10 of the *Code of Federal Regulations*, "Early Site Permits, Standard Design Certifications, and Combined Licenses for Nuclear Power Plants," the NRC can issue an ESP for approval of one or more sites for possible future construction of a nuclear power plant(s). The issuance of an ESP is separate from the issuance of a license to construct or operate a nuclear power plant. The review of an ESP addresses site safety issues, environmental protection issues, and plans for coping with emergencies, independent of the review of a specific nuclear plant design. Should an ESP be issued for Vogtle, Southern could reference the ESP in seeking, at some time during the term of the ESP, a license to construct or operate a nuclear power plant(s) on the site.

J. B. Powell

-2-

The government-to-government meeting will take place on May 10, 2006, from 3:30 p.m. to 4:30 p.m., in Room Number 163 at the Waynesboro campus of the Augusta Technical College (ATC), 216 Highway 24, Waynesboro, GA. The public meeting will take place the following day, May 11, 2006, from 7:00 p.m. to 9:30 p.m., in the ATC Auditorium. An open house will precede this meeting from 5:00 p.m. to 7:00 p.m. In addition, there will be an open house from 12:00 p.m. to 2:00 p.m. on May 10, 2006, at the Burke County Library, 130 Highway 24 South, Waynesboro, GA.

Enclosed please find the public meeting notice. If you have any questions regarding the meetings, please contact Christian Araguas of my staff by e-mail at [cja2@nrc.gov](mailto:cja2@nrc.gov) or by telephone at 301-415-3637.

Sincerely,

*/RA/*

Enclosure: Public Meeting Notice

April 25, 2006

Mr. Jimmy Dixon- Chairman  
P.O. Box 27  
Girard, GA. 30426

Dear Mr. Dixon:

I would like to invite you, as a public official who may have an interest in activities related to the Vogtle Electric Generating Plant, to a series of meetings with representatives of the U.S. Nuclear Regulatory Commission (NRC). Southern Nuclear Operating Company (Southern) expects to file an early site permit (ESP) application with the NRC in August 2006 for two new reactors at the Vogtle site. In anticipation of this event, the NRC is taking early action to interface with the local Waynesboro community.

The NRC is planning to host two informational meetings. The first meeting, to be held on May 10, 2006, will provide an opportunity for NRC staff to provide state and local public officials with a background of the NRC, our mission, and the ESP review process. This occasion will also be a good time for you to pose any questions and/or raise any concerns to NRC staff. The following day, May 11, 2006, the NRC is inviting interested members of the public to a meeting to discuss the ESP review process and opportunities for public involvement. Public participation in the meeting is encouraged, and plenty of time has been allotted for questions regarding the NRC licensing and application review processes. In addition, the NRC will host two 2-hour open houses preceding the meeting to allow for one-on-one interaction between the NRC staff and attendees.

Under the NRC's regulations in Part 52 of Title 10 of the *Code of Federal Regulations*, "Early Site Permits, Standard Design Certifications, and Combined Licenses for Nuclear Power Plants," the NRC can issue an ESP for approval of one or more sites for possible future construction of a nuclear power plant(s). The issuance of an ESP is separate from the issuance of a license to construct or operate a nuclear power plant. The review of an ESP addresses site safety issues, environmental protection issues, and plans for coping with emergencies, independent of the review of a specific nuclear plant design. Should an ESP be issued for Vogtle, Southern could reference the ESP in seeking, at some time during the term of the ESP, a license to construct or operate a nuclear power plant(s) on the site.

J. Dixon

-2-

The government-to-government meeting will take place on May 10, 2006, from 3:30 p.m. to 4:30 p.m., in Room Number 163 at the Waynesboro campus of the Augusta Technical College (ATC), 216 Highway 24, Waynesboro, GA. The public meeting will take place the following day, May 11, 2006, from 7:00 p.m. to 9:30 p.m., in the ATC Auditorium. An open house will precede this meeting from 5:00 p.m. to 7:00 p.m. In addition, there will be an open house from 12:00 p.m. to 2:00 p.m. on May 10, 2006, at the Burke County Library, 130 Highway 24 South, Waynesboro, GA.

Enclosed please find the public meeting notice. If you have any questions regarding the meetings, please contact Christian Araguas of my staff by e-mail at [cja2@nrc.gov](mailto:cja2@nrc.gov) or by telephone at 301-415-3637.

Sincerely,

Enclosure: Public Meeting Notice

April 25, 2006

Mr. Curtis Bell  
628 Myrick Street  
Waynesboro, GA. 30830

Dear Mr. Bell:

I would like to invite you, as a public official who may have an interest in activities related to the Vogtle Electric Generating Plant, to a series of meetings with representatives of the U.S. Nuclear Regulatory Commission (NRC). Southern Nuclear Operating Company (Southern) expects to file an early site permit (ESP) application with the NRC in August 2006 for two new reactors at the Vogtle site. In anticipation of this event, the NRC is taking early action to interface with the local Waynesboro community.

The NRC is planning to host two informational meetings. The first meeting, to be held on May 10, 2006, will provide an opportunity for NRC staff to provide state and local public officials with a background of the NRC, our mission, and the ESP review process. This occasion will also be a good time for you to pose any questions and/or raise any concerns to NRC staff. The following day, May 11, 2006, the NRC is inviting interested members of the public to a meeting to discuss the ESP review process and opportunities for public involvement. Public participation in the meeting is encouraged, and plenty of time has been allotted for questions regarding the NRC licensing and application review processes. In addition, the NRC will host two 2-hour open houses preceding the meeting to allow for one-on-one interaction between the NRC staff and attendees.

Under the NRC's regulations in Part 52 of Title 10 of the *Code of Federal Regulations*, "Early Site Permits, Standard Design Certifications, and Combined Licenses for Nuclear Power Plants," the NRC can issue an ESP for approval of one or more sites for possible future construction of a nuclear power plant(s). The issuance of an ESP is separate from the issuance of a license to construct or operate a nuclear power plant. The review of an ESP addresses site safety issues, environmental protection issues, and plans for coping with emergencies, independent of the review of a specific nuclear plant design. Should an ESP be issued for Vogtle, Southern could reference the ESP in seeking, at some time during the term of the ESP, a license to construct or operate a nuclear power plant(s) on the site.

C. Bell

-2-

The government-to-government meeting will take place on May 10, 2006, from 3:30 p.m. to 4:30 p.m., in Room Number 163 at the Waynesboro campus of the Augusta Technical College (ATC), 216 Highway 24, Waynesboro, GA. The public meeting will take place the following day, May 11, 2006, from 7:00 p.m. to 9:30 p.m., in the ATC Auditorium. An open house will precede this meeting from 5:00 p.m. to 7:00 p.m. In addition, there will be an open house from 12:00 p.m. to 2:00 p.m. on May 10, 2006, at the Burke County Library, 130 Highway 24 South, Waynesboro, GA.

Enclosed please find the public meeting notice. If you have any questions regarding the meetings, please contact Christian Araguas of my staff by e-mail at [cja2@nrc.gov](mailto:cja2@nrc.gov) or by telephone at 301-415-3637.

Sincerely,

Enclosure: Public Meeting Notice

April 25, 2006

Mr. Ronnie Baxley - Waynesboro Fire Chief  
706 Liberty Street  
Waynesboro, GA 30830

Dear Chief Baxley:

I would like to invite you, as a public official who may have an interest in activities related to the Vogtle Electric Generating Plant, to a series of meetings with representatives of the U.S. Nuclear Regulatory Commission (NRC). Southern Nuclear Operating Company (Southern) expects to file an early site permit (ESP) application with the NRC in August 2006 for two new reactors at the Vogtle site. In anticipation of this event, the NRC is taking early action to interface with the local Waynesboro community.

The NRC is planning to host two informational meetings. The first meeting, to be held on May 10, 2006, will provide an opportunity for NRC staff to provide state and local public officials with a background of the NRC, our mission, and the ESP review process. This occasion will also be a good time for you to pose any questions and/or raise any concerns to NRC staff. The following day, May 11, 2006, the NRC is inviting interested members of the public to a meeting to discuss the ESP review process and opportunities for public involvement. Public participation in the meeting is encouraged, and plenty of time has been allotted for questions regarding the NRC licensing and application review processes. In addition, the NRC will host two 2-hour open houses preceding the meeting to allow for one-on-one interaction between the NRC staff and attendees.

Under the NRC's regulations in Part 52 of Title 10 of the *Code of Federal Regulations*, "Early Site Permits, Standard Design Certifications, and Combined Licenses for Nuclear Power Plants," the NRC can issue an ESP for approval of one or more sites for possible future construction of a nuclear power plant(s). The issuance of an ESP is separate from the issuance of a license to construct or operate a nuclear power plant. The review of an ESP addresses site safety issues, environmental protection issues, and plans for coping with emergencies, independent of the review of a specific nuclear plant design. Should an ESP be issued for Vogtle, Southern could reference the ESP in seeking, at some time during the term of the ESP, a license to construct or operate a nuclear power plant(s) on the site.

R. Baxley

-2-

The government-to-government meeting will take place on May 10, 2006, from 3:30 p.m. to 4:30 p.m., in Room Number 163 at the Waynesboro campus of the Augusta Technical College (ATC), 216 Highway 24, Waynesboro, GA. The public meeting will take place the following day, May 11, 2006, from 7:00 p.m. to 9:30 p.m., in the ATC Auditorium. An open house will precede this meeting from 5:00 p.m. to 7:00 p.m. In addition, there will be an open house from 12:00 p.m. to 2:00 p.m. on May 10, 2006, at the Burke County Library, 130 Highway 24 South, Waynesboro, GA.

Enclosed please find the public meeting notice. If you have any questions regarding the meetings, please contact Christian Araguas of my staff by e-mail at [cja2@nrc.gov](mailto:cja2@nrc.gov) or by telephone at 301-415-3637.

Sincerely,

Enclosure: Public Meeting Notice

April 25, 2006

Mr. Pete Warren - State Representative  
112 Bennock Mill Road  
Augusta, GA. 30906

Dear Mr. Warren:

I would like to invite you, as a public official who may have an interest in activities related to the Vogtle Electric Generating Plant, to a series of meetings with representatives of the U.S. Nuclear Regulatory Commission (NRC). Southern Nuclear Operating Company (Southern) expects to file an early site permit (ESP) application with the NRC in August 2006 for two new reactors at the Vogtle site. In anticipation of this event, the NRC is taking early action to interface with the local Waynesboro community.

The NRC is planning to host two informational meetings. The first meeting, to be held on May 10, 2006, will provide an opportunity for NRC staff to provide state and local public officials with a background of the NRC, our mission, and the ESP review process. This occasion will also be a good time for you to pose any questions and/or raise any concerns to NRC staff. The following day, May 11, 2006, the NRC is inviting interested members of the public to a meeting to discuss the ESP review process and opportunities for public involvement. Public participation in the meeting is encouraged, and plenty of time has been allotted for questions regarding the NRC licensing and application review processes. In addition, the NRC will host two 2-hour open houses preceding the meeting to allow for one-on-one interaction between the NRC staff and attendees.

Under the NRC's regulations in Part 52 of Title 10 of the *Code of Federal Regulations*, "Early Site Permits, Standard Design Certifications, and Combined Licenses for Nuclear Power Plants," the NRC can issue an ESP for approval of one or more sites for possible future construction of a nuclear power plant(s). The issuance of an ESP is separate from the issuance of a license to construct or operate a nuclear power plant. The review of an ESP addresses site safety issues, environmental protection issues, and plans for coping with emergencies, independent of the review of a specific nuclear plant design. Should an ESP be issued for Vogtle, Southern could reference the ESP in seeking, at some time during the term of the ESP, a license to construct or operate a nuclear power plant(s) on the site.

P. Warren
