TO : Files

DATE:

FROM : J. C. Delaney *JCD*SUBJECT: MALLINCKRODT CHEMICAL WORKS APPLICATION FOR AMENDMENT TO SNM-33
(DOCKET NO. 70-36)

SYMBOL: CAL:JCD

ANALYSIS AND FINDINGS

An analysis of the application for special nuclear material license submitted by MCW October 21, 1957 for amendment of SNM-33 to permit changes in procedures of operation has resulted in the following observations, conclusions and findings.

The proposed use of special nuclear material is for the conduct of research and development activities of a type specified in Section 31 of the Act. All other statements of the memorandum to the Files dated April 15, 1957, "SNM License for MCW" are incorporated by reference.

The applicant is qualified to use the material for the purpose requested in accordance with the Act and the regulations of the Commission.

It is therefore determined that the license may be amended authorizing the activities proposed by the applicant.

APPROVED:

Lyall Johnson
Chief, Licensing Branch
