Its my allegation that the NRC wind study (on the Louisiana Energy Services enrichment plant in Lea County) is flawed.

It does not take into account that low wind speeds of 21 mph will cause blowing dusts in this area.(blowing dust warnings also.) Adding the emissions u234, u235, u236, u238 into these blowing dusts increases the probability that the atmospheric dust particles will become radioactive and a hazard to the public health in Lea County.

Phillip Barr
Lea County
