Re: License Number 47-19142-01

To Whom It May Concern

Please amend our radioactive materials as follows:

1. This license currently authorizes the use of Iridium 192 permitted by 10 CFR 35.600 for the use in a Nucletron HDR unit. We do not currently have an active HDR program therefore it is our intent to suspend the use of this unit. The Ir-192 source(s) will be removed by the Nucletron service engineer and returned to the vendor. We will however, keep the HDR unit in its current secured location. The room will not be released for unrestricted use. The unit in storage will receive regular maintenance by the vendor service engineer and all policies and procedures incident to the program will be maintained.
2. In the event that the HDR program is reactivated, the NRC will be notified prior to first use of the unit.

Thank you for your attention to this matter.  
Sincerely,

Charles M. Olmsted, M.D.  
Radiation Safety Officer
