April 17, 2006

U.S. Nuclear Regulatory Commission
Attention: Document Control Desk
Washington, D.C. 20555-0001

Subject: Corrected Technical Specification Page from Amendment No. 218
Cooper Nuclear Station, Docket 50-298, DPR-46

- References:
1. Letter from Randall K. Edington, Nebraska Public Power District, to U.S. Nuclear Regulatory Commission, dated April 13, 2005, "License Amendment Request to Adopt Generic Changes to Standard Technical Specifications"
 2. Letter from Brian Benney, U.S. Nuclear Regulatory Commission, to Randall K. Edington, Nebraska Public Power District, dated March 30, 2006, "Cooper Nuclear Station – Issuance of Amendment Re: Technical Specification Change Request for Various Sections."

The purpose of this letter is to provide a corrected page for the Cooper Nuclear Station (CNS) Technical Specification (TS) as revised by Amendment No. 218.

By Reference 1 Nebraska Public Power District (NPPD) submitted a license amendment request with markup and final typed TS pages. The logical connectors in Condition A Required Action of TS Section 3.9.1 were correctly aligned on the markup of TS page 3.9-1 but were incorrectly aligned on the final typed page. The U.S. Nuclear Regulatory Commission issued Amendment No. 218 by Reference 2 with the incorrect TS page.

The incorrect page issued with Amendment 218 was discussed with the NRC Project Manager for CNS. The project manager requested that NPPD provide the corrected page by formal letter. The corrected TS page 3.9-1 is attached. It is requested that this corrected page be issued to NPPD no later than May 10, 2006, in order to allow adequate time to implement the amendment.
