

VENDOR OVERSIGHT

Nuclear Quality Oversight Conference

Kerri Kavanagh

Office of Nuclear Reactor Regulation

Division of Engineering

Quality and Vendor Branch A

Quality and Vendor Branch, NRR

- NRR Reorganization in October 2005
 - Two Quality and Vendor branches in Division of Engineering
- Key Areas of Review:
 - Quality Assurance Program Descriptions
 - Extended Power Uprate Testing Programs
 - New Reactor Licensing Reviews and Inspections
 - Early Site Permits
 - Design Certifications
 - Combined License Applications
 - Vendor Inspections
 - NUPIC Audit Process Oversight
 - 10 CFR Part 21 Program Evaluations

February 17, 2006

NRC Vendor Oversight

- NRC/NUPIIC Interface
 - Draft Protocol for Observation of NUPIIC Audits
 - ENSA, Westinghouse/NUPIIC Audit Santander, Spain, September 2005
- Quality and Vendor Branch Inspections
 - General Electric Nuclear Energy (GENE), Wilmington, NC, November 2005
 - Flowserve, Raleigh, NC, January 2006

NRC/NUPIC Interface

- **Equipos Nucleares, SA (ENSA)**
 - 3 NRC Inspectors Observed the Westinghouse led/NUPIC (TXU & PGE) joint audit.
 - Audit team identified 12 findings with ENSA implementation of their QA program:
 - Indoctrination and Training
 - Design control
 - Document control
 - Control of Special Processes (welding)
 - Control of Measuring & Test Equipment
 - Corrective Action
 - Quality Assurance Records
 - Internal Audits and Supplier Audits
 - Nonconforming, Materials, Parts ,and Components (including 10 CFR Part 21)

NRC Vendor Inspections

- GENE ESBWR Design Certification
- Inspection Report Findings Issued January 11, 2006 (ML053560155)
 - GENE did not implement the ESBWR design control process.
 - External supplier audits performed by GENE did not identify and audit against the appropriate quality assurance program requirements.
 - GENE did not document or maintain training records.
 - GENE did not perform internal self-audits of the ESBWR program.
 - GENE did not complete the acceptance reviews associated with several ESBWR corrective action reports within the 30 day period.

NRC Vendor Inspections

- Flowserve – Major Supplier of Safety Related Valves and Flow Control Devices
- Inspection Report Findings Issued February 8, 2006 (ML060310185)
 - Flowserve did not adequately implement their corrective action process.
 - Flowserve did not have procedures in place to perform 10 CFR Part 21 evaluations of significant conditions adverse to quality identified in their corrective action process.
 - Flowserve failed to implement appropriate procedural guidance.

10 CFR Part 21

- NRC will be verifying implementation of 10 CFR 21 as required by 10 CFR 21.21 during NUPIC observations and NRC vendor inspections.
- Recent Inspection/NUPIC Audit Findings
 - Misunderstanding of Part 21 passed down to commercial grade suppliers on procurement documents.
 - Inadequate Part 21 evaluation procedure.
 - Inadequate Appendix B procedural control to tie corrective action process into Part 21 evaluation process when applicable.

Commercial-Grade Calibration Suppliers

- Arizona Public Services – Bases of NRC approval documented in safety evaluation report (SER) dated September 28, 2005 (ML052710224).
- Alternative method for qualifying suppliers in lieu of supplier audit, commercial-grade survey, or in-process surveillance for commercial-grade suppliers of calibrations services.
- NRC staff has received inquiries regarding the applicability of SER to vendors.

Commercial-Grade Calibration Suppliers

- 3rd party accreditation is to ANSI/ISO/IEC 17025.
- NRC review and approval limited to NVLAP and A2LA, as recognized as ILAC signatories (applies to domestic suppliers only).
- Scope of accreditation covers contracted services.
- Purchase documents impose additional technical and administrative requirements to satisfy necessary QA program and technical requirements.
- Purchase documents require reporting as-found calibration data when calibrated items are found to be out-of-tolerance.
- Purchase document shall require identification of the laboratory equipment/standards used.

NRC Future Activities

- Observation of future NUPIC audits.
- Development of Quality and Vendor Branch Website.
- Continuation of ASME/NQA-1 Activities.
- Continuation of Reviews and Inspections of Design Certifications, Early Site Permits, and Combined Licenses.
