REMARKS: IMC 2501 (Construction Inspection Program: Early Site Permit (ESP)) has been revised to delete requirement for Regional Administrator to send letter to NRR Office Director recommending issuance of Early Site Permit.

IMC 2503 (Construction Inspection Program: Inspections of Inspections, Tests, Analyses, and Acceptance Criteria (ITAAC)) has been issued to specify the policy and inspections used for the NRC's inspection of the Inspections, Tests, Analyses, and Acceptance Criteria of a combined license.

IMC 2504 (Construction Inspection Program - Non-ITAAC Inspections) has been issued to specify the non - ITAAC inspection policies for the review of the operational readiness of a plant licensed under 10CFR Part 52.

This is the initial issuance of IMC 2503 and IMC 2504. The staff recognizes that these IMC's will likely under go significant revisions during the next several years as both internal and external stakeholders provide feedback on these IMC's. This initial issuance is intended to promote such feedback, in order that the inspection programs described in these IMC's can benefit from the resulting revisions prior to the start of construction of future plants.
