Dear Ralph,

It looks good to me. I can't find the extraneous "I".

There are lesser items that we moved already (e.g., prehydrating system, out-of-cell LOCA apparatus) and other equipment capabilities (optical microscope, SEM) that we are working on recovering outside the AGHCF boundaries.

As far as a briefing is concerned, you probably do not want to get into all of that.

I am interested in the bullets.

Mike

Mike,

How about this plus a page of bullets?

Ralph
