Subject: Argonne and Commission Meeting on Fuel Reliability

Farouk,

As a result of a request apparently made at your Division meeting today, I contacted Frank Akstulewicz about the upcoming meeting on Fuel Reliability and offered him our Commission "D" note on the Argonne Hot Cell closure (see attached).

Frank called me from home (where he has been sick for the past few days). He said he wanted to see the "D" note and other material but, if a question came up at the Commission meeting, he plans to defer the question to Carl Paperiello (who is supposed to be at the table).

On another subject, Frank suggested a joint NRR/RES staff presentation on RIA methodology to you and Tom Martin - prior to the RIC presentation by Paul Clifford. That is okay with me.

John
