Subject: SV: North Anna ZIRLO(TM) maaterial for ANL testing

Hello,

We are fainally ready with the calculation for the total activity of the 8 cladding pieces. I have good news, all 8 pieces fit into one container.

I have been informed that the containers are on their way back from ANL, so the transportation will be delivered shortly. I will give you the date as soon as I know.

Best regards,

Cecilia

Okay, thank you.

Ralph

Ralph,

First I want to wish you a Happy New Year!

Time is running and we are getting closer to the shipment of the eight cladding samples. We will be ready to deliver the shipmen by the end of January.

We had a communication with Mike Billone at ANL, saying that they will be ready for the return of the containers presently at ANL, next week or the week after.

We will be able to tell you how many containers that will be necessary for the eight samples by the beginning of the week staring with 23 January.

Best regards,

Cecilia
