Rear Admiral Art Clark (Ret.)
Deputy Laboratory Director – Operations
Idaho National Laboratory
Idaho Falls, ID 83415

Dear Art,

This letter is to confirm the intent of Argonne to accept the Framatome spent fuel at Argonne National Laboratory and archive it as previously agreed to.

Argonne further intends to perform the research agreed to with sponsors with the following caveats:

- 1) Argonne successfully reaches an contractual agreement for an outside hot cell facility for any work requiring such a facility
- 2) Argonne's proposal for this research is funded.

Having stated these caveats, I do not anticipate that either will in reality become an issue.

With best regards,

Don Joyce
Deputy Director
