

UNITED STATES NUCLEAR REGULATORY COMMISSION REGION IV 611 RYAN PLAZA DRIVE, SUITE 400 ARLINGTON, TEXAS 76011-4005

April 28, 2006

Randall K. Edington, Vice President-Nuclear and CNO Nebraska Public Power District P.O. Box 98 Brownville, NE 68321

SUBJECT: COOPER NUCLEAR STATION - NRC INITIAL OPERATOR LICENSING EXAMINATION REPORT 05000298/2006-301

Dear Mr.Eddington:

In a telephone conversation on April 7, 2006, between Messrs. T. O. McKernon, Chief Examiner, and J. Dedic, Supervisor, Operator Training, arrangements were made for the administration of licensing examinations at your Cooper Nuclear Station during the weeks of October 2 and 9, 2006

As agreed during the telephone conversation, the facility staff will prepare the written examinations based on the guidelines in Revision 9 of NUREG-1021, "Operator Licensing Examination Standards for Power Reactors." The NRC regional office will prepare the operating test outline and tests as agreed upon. The remainder of the operating test will be developed by your facility staff. The NRC regional office will review and discuss with your staff any changes that might be necessary before the examinations are administered.

The supporting reference materials identified in Attachment 2 of ES-201 and the integrated exam outlines should be provided to the NRC by July 19, 2006. The portions of the draft examination you are developing along with any supporting material are to be provided to us by August 3, 2006. Any delay in receiving the required examination and reference materials, or the submittal of inadequate or incomplete materials, may cause the examinations to be rescheduled. Additionally, an onsite validation of the examination material will be performed during the week of September 11, 2006. Sufficient staff resources and the simulator should be made available for the examination validation.

In order to conduct the requested written examinations and operating tests, it will be necessary for your staff to provide adequate space and accommodations in accordance with ES-402, and to make the simulation facility available on the dates noted above. In accordance with ES-302, your staff should retain the original simulator performance data (e.g., system pressures, temperatures, and levels) generated during the dynamic operating tests until the examination results are final.

Appendix E of NUREG-1021 contains a number of NRC policies and guidelines that will be in effect while the written examinations and operating tests are being administered.

To permit timely NRC review and evaluation, your staff should submit preliminary reactor operator and senior reactor operator license applications (Office of Management and Budget (OMB) approval number 3150-0090), medical certifications (OMB approval number 3150-0024), and any waiver requests (OMB approval number 3150-0090) at least 30 days before the first examination date, or no later than September 6, 2006. Signed applications certifying that all training has been completed should be submitted at least 14 days before the first examination date, or no later than September 18, 2006. If the applications are not received at least 14 days before the examination date, a postponement may be necessary.

This letter contains information collections that are subject to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 et seq.). These information collections were approved by the Office of Management and Budget, approval number 3150-0018, which expires on June 30, 2006.

The public reporting burden for this collection of information is estimated to average 500 hours per response, including the time for reviewing instructions, gathering and maintaining the data needed, writing the examinations, and completing and reviewing the collection of information. Send comments on any aspect of this collection of information, including suggestions for reducing the burden, to the Information and Records Management Branch (T-6 F33), U.S. Nuclear Regulatory Commission, Washington, DC 20555-001, or by Internet electronic mail at <u>BJS1@NRC.GOV;</u> and to the Desk Officer, Office of Information and Regulatory Affairs, NEOB-10202, (3150-0018), Office of Management and Budget, Washington, DC 20503.

The NRC may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter, its enclosures, and your response will be available electronically for public inspection in the NRC Public Document Room or from the Publicly Available Record (PARS) component of the NRC's document system (ADAMS). ADAMS is accessible from the NRC Web site at http://www.nrc.gov/NRC/ADAMS/index.html (the Public Electronic Reading Room).

Thank you for your cooperation in this matter. Mr. J. Dedic has been advised of the policies and guidelines referenced in this letter. If you have any questions regarding the NRC's examination procedures and guidelines, please contact Mr. Tom McKernon at 817-860-8153, or myself at 817-860-8159.

Sincerely,

/RA/ GWJ for

Anthony T. Gody, Chief Operations Branch Division of Reactor Safety
