SUBJECT: REVIEW OF PA'INA HAWAII'S GEOTECHNICAL REPORT

We have received a geotechnical report (enclosed) for the construction of the proposed Pa'ina Hawaii irradiation facility. We would like to have Ray Kellar of your staff review this report. He would need to review the technical aspects of the report and determine if the conclusions in the report are supported by the technical data. We would also need a written response of his findings to document his review. Please let me know if this is possible, and if so when this could be accomplished.
