Diana:

At this time no additional public meetings are scheduled. There is a possibility that we might have another public meeting before allowing preoperational testing after completion of our technical review.

The hearing process is separate from the licensing process. If a request for a hearing is filed, it will be coordinated by the NRC's Office of General Counsel and the Atomic Safety and Licensing Board Panel. For more information on the hearing process, please go to the following link:

Aloha Roberto:

Checking to see if there will be any public meetings on the irradiator over the next 60 days, or if any additional meetings will depend on whether a request for a hearing is filed.

Can you let me know?

Thank you,
