Subject: SISIP criteria

All of you expressed interest during the 8/31/05 public meeting of receiving a copy of the Sensitive Information Screening Project (SISIP) criteria used to redact information from the Pa'ina Hawaii, LLC, license application for the possession and use of radioactive material in an irradiator. Unfortunately, this document is labeled "Official Use Only" and cannot be made publicly available. However, in the spirit of sharing pertinent information with stakeholders, I can tell you that the SISIP criteria instructs NRC staff to redact information pertinent to:

1. Design and description of structures, equipment, operating procedures that are site specific
2. Details of the emergency planning and emergency response
3. Security and access control information
4. Design information and description that are non-site specific, such as sealed source design and configuration
