>My apologies for not being clear in my communication. My intent was for members of the public using your library system to have access to the electronic files. However, I can still mail hard copies of the material. To what address do I need to send the material? In the package I will indicate which libraries should receive copies. Thanks.

>My secretary received your email and printed out 113 pages! Please do not email us this type of material in the future. I recommend that in any future communications, you warn recipients about the size of the files. We are currently experiencing email problems, and these large files may cause a further load on our system.

>In future, please send a sufficient number of hard copy documents which you wish to be made available to the public and indicate at which of our 51 libraries you wish to have these made available and for what period of time. Thank you.
