Subject: Re: Correction to Federal Register for EIE final rule

Alzonia, I was finally able to raise this issue with my management in NSIR/DNS. They have no objections to waiting until the cumulative correction notice to issue the final rule (provided the notice is published in the FR before the end of 2004). However, they believe that NMSS/IMNS should also approve of this approach. I have cc'd Sandy Wastler of IMNS/RGB on this e-mail to get IMNS' thoughts.

For Sandy's benefit, I will restate the problem. In 10 CFR 40.66 and 40.67 advance notifications of source material shipments are required to be made to NSIR/DNS. However, not all of the paragraphs in these two sections were corrected to DNS in the final EIE rule. Currently, 40.66(b)(5), 40.66(c), 40.67(c), and 40.67(d) refer to IMNS or to an IMNS phone number, rather than to DNS.

Please contact me if you have further questions.

Thanks
Phil Brochman

I have been assigned the task of preparing the correction notice. I was wondering if we could just include your request in our cumulative correction notice that we send to the OFR at the end of the year, or if you believe the issue of your request is important enough that we should prepare a correction notice asap. Please let me know what you think.

Subject: Correction Notices

Mike, FYI - I noted a typo in an NRC FRN published today, 69 FR 62485.

In Table 1A, line F.1, the exponent for the metric value is printed as a subscript, not a superscript. Mathematically this changes the equation from 3.7 times 10,000 (10 to the 4th power) to 3.7 times 4 (10 base 4).

Separately, I had earlier this year, provided info on some corrections to 40.66 and 40.67 to send all advance notification to Dir DNS in NSIR. Your staff indicated a desire to roll this issue into the annual correction notice. We agreed. Question:

1. Do you need any further information from me.
2. Will this agency correction notice be published before 12/30/04?
