**Subject:** Request for point of contact in FAA

The U.S. Nuclear Regulatory Commission (NRC), RIV office in Arlington, Texas, received a license application request from Pa'ina Hawaii, LLC, for the operation of an underwater pool type commercial irradiator. The proposed location is nearby the Honolulu airport (see attached press release-pdf file). NRC needs to identify a point of contact in FAA with whom we can share information about this application process. NRC plans to conduct several public meetings and prelicensing inspections in Hawaii during the construction phase. The first public meeting is going to be held in Hawaii on August 31, 2005 (see attached email). FAA is invited to be part of the audience.
