Subject: Request for point of contact in FAA

The U.S. Nuclear Regulatory Commission (NRC), RIV office in Arlington, Texas, received a license application request from Pa'ina Hawaii, LLC, for the operation of an underwater pool type commercial irradiator. The proposed location is nearby the Honolulu airport (see attached press release-pdf file). NRC needs to identify a point of contact in FAA with whom we can share information about this application process. NRC plans to conduct several public meetings and preclicensing inspections in Hawaii during the construction phase. The first public meeting is going to be held in Hawaii on August 31, 2005 (see attached email). FAA is invited to be part of the audience.

Roberto J. Torres

Subject: August

The attached 3-page pdf file announces a U.S. Nuclear Regulatory Commission (NRC) public meeting regarding Pa'ina Hawaii, LLC, license application request for the operation of an irradiator in Hawaii. This meeting is the first of several public meetings that the NRC will hold in Hawaii to enhance public awareness of the NRC's independent regulatory role in protecting public health and safety and the environment and to allow public involvement in NRC decision-making matters associated with this license application. The public is invited to participate in this meeting by providing comments and asking questions throughout the meeting.

Roberto J. Torres
Acting Branch Chief
U.S. Nuclear Regulatory Commission, Region IV
Division of Nuclear Materials Safety
