Charlevoix, MI 49720

Dear Ms. Regan-Brown:

Enclosed is Amendment No. 07 to your NRC Material License No. 21-32044-01 in accordance with your request. This amendment adds to your NRC license the new make and model (Thermo Electron Corporation, Model CBX Cross-Belt Elemental Analyzer) of fixed gauges as requested. It also corrects the model number of the Gamma-Metrics gauge currently authorized on your license, and in your possession, from a Model CB to a model CB-S, as discussed in our telephone conversation on April 27, 2006. Please note that License Items 7 and 8 have been modified using our current format, based on 10 CFR 30.32 (g) and the licensing guidance in NUREG 1556 Volume 4. Please note that the changes made to your license are printed in **bold** font.

Please review the enclosed document carefully and be sure that you understand all conditions. If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission, Region III office at (630) 829-9887 so that we can provide appropriate corrections and answers.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter will be available electronically in the NRC Public Document Room or from the Publicly Available Records (PARS) component of NRC's document system (ADAMS). The NRC's document system is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>. The enclosed license document is exempt from public disclosure in accordance with 10 CFR 2.390, because its disclosure to unauthorized individuals could present a security vulnerability.

Sincerely,

A handwritten signature in black ink, appearing to read "Loren J. Hueter".

Loren J. Hueter
