Subject: Fwd: "D" note on Unavailability of Argonne facility

Frank:

At our Division meeting today, several topics were raised - including the Argonne Hot Cell closing and the upcoming Commission meeting on fuel reliability (02/06/06 at 09:30AM).

It has been surmised that the two issues may be mingled at the Commission meeting (i.e., the staff gets asked a question about Argonne during the fuel reliability meeting).

I have been told to offer you the attached "D" note as background material for your presentation - just in case you get asked about Argonne.

John
