Mr. Richard Widdowson
Schneider Electric-Square D Company
1415 South Roselle Road
Palatine, Illinois 60067

March 24, 2006

Dear Mr. Widdowson:

Yates Foil USA Inc. is working the US Nuclear Regulatory Commission to determine the disposition of the radio active sources contained in two Asoma photometers, one of which was located on the drum deck, and the other on the treater deck. The Asoma units were installed between 1987-1989 when Square D was operating the plant. We cannot find any record of their disposal from 1996 forward while Yates Foil USA Inc. was operating the plant, or from 1990-1996 when the plant was operated by AFEC's Circuit Foil USA.

Since we have no records from the time period when Square D was operating the plant we cannot determine if the radioactive sources were disposed of during that time period. We also do not know if they may have been disposed of when then plant was dismantled and demolished in 2004-2005.

Is it possible you have any records that may help? If so Yates Foil hereby requests Square D to forward to Yates Foil any information in its possession, or the possession of its contractor(s) regarding the disposition of the radioactive sources contained in the two Asoma units.

Please forward the requested information to the attention of Joe Feather at Yates Foil USA, Inc., P.O. Box 826, Moorestown, New Jersey 08057 at your earliest possible convenience, and also cc Mr. Rolph.

Sincerely,

Joseph N. Feather
CFO
Yates Foil USA Inc.
