

**ENCLOSURE 1**

**NOTICE OF VIOLATION**

Entergy Operations, Inc.  
Arkansas Nuclear One (ANO)

Docket No.: 50-313  
License No.: DPR-51

During an NRC inspection conducted on December 3-18, 1996, one violation of NRC requirements was identified. In accordance with the "General Statement of Policy and Procedure for NRC Enforcement Actions," NUREG-1600, the violation is listed below:

10 CFR 72.48(a), states, in part, that a licensee may make changes to the ISFSI described in the Safety Analysis Report or in the procedures described in the Safety Analysis Report if the changes do not constitute an unreviewed safety question, a significant increase in occupational exposure, or a significant unreviewed environmental impact.

10 CFR 72.48(b)(1) requires, in part, that a licensee maintain records of changes to the ISFSI and changes in procedures made pursuant to this section if these changes constitute changes in the ISFSI or procedures described in the Safety Analysis Report. These records must include a written safety evaluation that provides the bases for the determination that the change does not involve an unreviewed safety question.

ANO Procedure 1022.039, "Ventilated Storage Cask 10 CFR 72.48 Reviews," provides instructions to perform and document safety evaluations required by 10 CFR 72.48.

Contrary to the above, for nonconformances described in ANO Condition Report CR-C-96-0149, Nonconformance Report (NCR) MTC-1-05, March Metal Fab, Inc., IR 5059-007, NCR MTC-1-09, NCR MTC-1-12, and NCR YOKE-01, the licensee did not perform and document safety evaluations in accordance with ANO Procedure 1022.039 and, therefore, did not evaluate and document whether an unreviewed safety question, as defined in 10 CFR 72.48, existed.

This is a Severity Level IV violation (Supplement VI).

Pursuant to the provisions of 10 CFR 2.201, Entergy Operations, Inc., is hereby required to submit a written statement or explanation to the U.S. Nuclear Regulatory Commission, ATTN: Document Control Desk, Washington, D.C. 20555 with a copy to the Regional Administrator, Region IV, 611 Ryan Plaza Drive, Suite 100, Arlington, Texas 76011, and a copy to the NRC Resident Inspector at the facility that is the subject of this Notice, within 30 days of the date of the letter transmitting this Notice of Violation (Notice). This reply should be clearly marked as a "Reply to a Notice of Violation" and should include for each violation: (1) the reason for the violation, or, if contested, the basis for disputing the violation, (2) the corrective steps that have been taken and the results achieved, (3) the corrective steps that will be taken to avoid further violations, and (4) the date when full compliance will be achieved. Your response may reference or include previous docketed correspondence, if the correspondence adequately addresses the required response. If an

adequate reply is not received within the time specified in this Notice, an order or a Demand for Information may be issued as to why the license should not be modified, suspended, or revoked, or why such other action as may be proper should not be taken. Where good cause is shown, consideration will be given to extending the response time.

Because your response will be placed in the NRC Public Document Room (PDR), to the extent possible, it should not include any personal privacy, proprietary, or safeguards information so that it can be placed in the PDR without redaction. However, if you find it necessary to include such information, you should clearly indicate the specific information that you desire not to be placed in the PDR, and provide the legal basis to support your request for withholding the information from the public.

Dated at Arlington, Texas  
this 22nd day of January 1997
