Carol Lentz Warner Lambert, LLC 734-622-4467

SUBJECT
Licensee's letter dated 4/21/06

SUMMARY
Mike and I called Ms. Lentz to discuss her 4/21/06 letter that described decommissioning activities that were to begin on May 1, 2006, at two locations; one under license number (21-01443-06) and the other at (21-32115-01). The first license number will involve the release of a location of use for unrestricted use, and the second will involve termination.

Mike and I explained to Ms. Lentz that if their decommissioning activities will go beyond the scope of what is currently approved in these two licenses, they cannot begin decommissioning until they develop a decommissioning plan (DP) and receive approval of the plan(s) by the NRC through a license amendment.

Ms. Lentz said that she understood this and that at this time they believe all decommissioning activities can be done under both licenses. Next week their contractor will be conducting additional surveys to evaluate for contamination. If they discover any contamination that will require decommissioning activities beyond the scope of their license they will develop DP and submit it for our review.

Ms. Lentz agreed to FAX a letter clarifying the above.
