Subject: FW: 2/7 sampling

Folks-we will be doing split samples on all Phase 1 and MW-111 well samples that are available on Feb 7 Tuesday-

Reid-I will need radwaste support to have MT drums available in unit 2 transformer yard and Mob area

Tom-we need to have two techs available

Ron S-you will need to escort the DEC guy-he's a dept of health guy who has never been to IPEC-he will be at the EOF at 0700 am for OCA badging-DEC is sending me his SSN etc.

Kathy-do you want to take photos?

Bill S.-because many of these samples will have elevated HTO, how do we give the samples to the DEC and NRC via a chain of custody?

Greg(NRC)-are you going to be the NRC point for this or Noggle?

All pls get back to me confirming ok to go here.

Ty-bill

Subject: 2/7 sampling

Bill,

We are all set for Tuesday the 7th for split sample collection.

John Frisone from our contaminated sites group in the Radiation Section will be arriving at 7:00AM to observe sampling and take custody of our splits.

AB2

Will he be able to retain physical custody from the point of collection, or is there any need for Rad Protection to check them before they leave the site?

I'm asking so that we are prepared to maintain proper chain of custody.

John Frisone
