Jim,

I am passing on your request to the team members. I do not believe the second round was completed but I may be incorrect. Either way, I will get the request to the correct person. I will seek out the drawing you've requested.

Dear Don,

Thanks for all your help. I believe Paul Dobe? had been conducting the K-T analysis. I had reviewed the first effort. I understand that there was a second round at identifying the source of contamination. Is the second round K-T analysis available? Is the K-T finished? As you know, this represents the IPEC root cause analysis for this issue and NRC review of your efforts is necessary in order to give IPEC credit for their work. Also, I would like an electronic copy of the GZA site map that shows the locations of the 9 monitoring wells and 8 "due diligence" wells, if you can. Thanks in advance.

Regards,

Jim

Subject: Correction to Executive Summary Sheets

Please note the correction to the attached sheets regarding sample data for MH-2 & MH-3. Data from 12-16-05 was incorrectly listed as MH-3 when it was actually MH-2.

Ron
