Subject: Complete 2/7 List of NYS H-3

Attached is the complete list of H-3 #'s from Wadsworth lab. I received them just this morning. They include the splits from 2/7 and 2/8, as well as the 3 background samples I collected on 1/30. Please consider these preliminary results until I confirm with DOH.

All off-site samples, splits and backgrounds, are reported as <90 pCi/l.

MW-38 is reported as < 110 pCi/l.

However, as you will see, MW-48 is reported as 250 +/- 110 pCi/l. A very low number, but not <LLD. I understand that the Entergy value is <LLD, for an LLD of ~ 420 pCi/l. Not inconsistent w/Wadsworth results.
