Subject: DWG figure file for GW flux/dose calc

Hi Don,

Here is the DWG file for Jim (also copied). Please let me know if this goes through. The file is fairly big (7MB) and your e-mail may not take it.

Hi Don,

This should do it. It is the more formal figure that we prepared over the weekend, ideally to be included with the final report to the NRC, which may have gone out last Friday (prior to the figure being completed).

You should be able to blow this up

Matt, the NRC (Jim Noggle) needs the non-scanned image as requested in the March 4 request below. Please provide.

A/1110

Dear Don,

We need the actual drawing file not a scanned image. NRC hqtrs wants to blow this up, therefore the original drawing is required. Please ask GZA for this. Thanks.

Regards,

Jim

Jim,

Attached is the drawing you have requested. I am contacting Gary Hinrichs regarding your request to speak with Matt Barvenik. I will let you know which day and time for the call.

Dear Don,

On the morning of Feb 28th, GZA and Steve Sandike presented the latest dose calculation based on a water balance method developed by Matt Barvenik. We have some followup questions with Matt. Would like to set up sometime on Wednesday or Thursday this week to call him. Prior to that call, we would like to get an electronic version of the site map layed out in 4 Areas and Zones A-E. This GZA map was included as Figure 2 in the handouts we were given. It was printed from a computer screen with a title of
\\Desktop\indianpoint\CAD_2-14-06\Surveyor-Source\gzasw.dwg. Thanks, Don.

Regards,

Jim

Subject: FW: Requested Sample Data

To all;

Please note that the previous version of this listed the samples taken in February as 2005. They were actually taken in 2006. The report has been changed to reflect this oversight.

Thank you for your time and consideration.

Ron LaVera CHP
