Salem, WV 26426-0500

SUBJECT: SALEM INTERNATIONAL UNIVERSITY, CONSENT TO TRANSFER LICENSE,
CONTROL NO. 138506

Dear Dr. Reynolds:

This refers to your letters dated February 24, 2006, and May 8, 2006, describing the transfer of your licensed activities to Salem International University, LLC. From your letter, we understand that this transfer will not result in any change to the licensed name, location of use, materials, persons using licensed material, or persons responsible for radiation safety at the licensed facility.

Based on the above understandings, we have no objection to this transfer. Future changes in the licensed name, use, location, persons responsible for licensed material require submission of a request to amend the license. NRC approval must be received prior to implementation of the proposed change.

Please note that your license currently authorizes possession only pending the restart of licensed activities. In order to restart licensed activities, you must submit an amendment request providing the information described in our letter of March 22, 2005. Also, review the regulations in 10 CFR 30.36(d)(2) and (3) which require the licensee to provide written notice within 60 days of a determination by the licensee to cease licensed activities or licensed activities have not occurred within the previous 24 months. If either of these conditions are met, then you must start the decommissioning process which would include surveys showing that fixed and removable contamination are below the limits requiring decontamination. The surveys must be performed by the licensee or a contractor in accordance with the guidance found in NUREG-1727. Classrooms and laboratories where licensed material were used can not be renovated or released for unrestricted use until they are decommissioned.

R. Reynolds
Salem International University
