Larry:

Thank you for your report. Can you give me an update on the condition of Pond 4?

Steve

Steve:

During routine weekly monitoring of Commercial Evaporation Pond #4, there was a substantial increase in the water levels in the NE, NM, SE, and SM underdrains. Water samples were collected from these underdrains and submitted to the Lab for analysis. The conductivity readings of these samples would indicate a leak in the upper liner of this pond. CBR has begun transferring water from Pond #4 to Pond #3. Once the level has been lowered, the liner will be examined for damage and all necessary repairs will be made. As per License Condition water samples will be collected from the underdrains every 7 days and analyzed for conductance, chloride, alkalinity, sodium and sulfate. Water levels in the underdrains will be monitored daily. If you have any questions please feel free to contact me at 308-665-2215 ext 114 or e-mail me at daxmynus@msn.com.

Thank you
Larry Teahon
