SUBJECT: SUMMARY OF MARCH 29, 2006, ANNUAL ASSESSMENT MEETING WITH DOMINION NUCLEAR CONNECTICUT AND THE CONNECTICUT NUCLEAR ENERGY ADVISORY COUNCIL (NEAC)

On March 29, 2006, at 3:00 p.m., an Annual Assessment Meeting was conducted at the Lelan F. Sillin Training Facility, Waterford, CT, between the Nuclear Regulatory Commission (NRC) and Dominion Nuclear Connecticut (Dominion). The NRC requested the meeting with Dominion management to discuss the NRC's assessment of the safety performance of the Millstone Nuclear Power Plant for calendar year 2005. At 6:00 p.m. the same day a joint meeting with NEAC was conducted at the Waterford Town Hall, Waterford, CT, to discuss the implementation of the Reactor Oversight Process and to answer questions regarding the Millstone Nuclear Power Plant performance for calendar year 2005.

The NRC presented and discussed its assessment of the safety performance of Millstone Units 2 and 3 for the period between January 1 through December 31, 2005. The NRC presentations included a discussion of the reactor oversight process, general background on both plants, performance assessment results, and an overview of calendar year 2006 planned inspections. As part of the annual assessment meeting at 3:00 p.m., Dominion presented an overview of their performance in the areas of post-maintenance testing and operability evaluations. At the 6:00 p.m. meeting, the NRC provided NEAC with an overall assessment of plant performance and with specifics concerning selected inspection findings.

The public observed both meetings and was offered the opportunity to communicate with the NRC regarding Dominion's performance at Millstone and the role of the Agency in ensuring safe plant operations. At the end of both meetings, the NRC answered questions from the public including a discussion of events and issues that occurred at the Millstone units over the previous year and the effluents that were released. The meeting notices with attached meeting agenda can be located in ADAMS Accession No. ML060660566 and ML060660570.
