Ron,

I spoke with an ex-employee who was our Environmental manager, and he believes some records might be in storage. I will travel to the storage facility sometime this week, and let you know what I can find.

Joe

Joe,

Is it possible to find paperwork for disposal, or who disposed of them for you, for the Asoma instruments? The manufacturer still has them assigned to the Bordentown site.

Thanks
Ron

Ron,

One piece of equipment you supplied information on is a Prolimeter, and the Krypton 85 source for it was disposed of in July 2005 by Adaptive Technologies in the person of Sam Silverman. (301-519-1174)

The other two are Photometers, the Asoma units, that were left at the facility in Bordentown, which was subsequently dismantled. Our best recollection is the sources for them were disposed of in the early 1990's.

Let me know if I can be of further assistance.
