1.	IMC 1246 App A-VI	01/26/05
2.	IP 71111.07	06/06/05
3.	IP 71122.01	01/24/03

TRANSMITTED:

	<u>Number</u>	<u>Date</u>
	IMC 1246 App A-VI	05/25/06
	IP 71111.07	05/25/06
	IP 71122.01	05/25/06

TRAINING: None.

REMARKS: IMC 1246 App A-VI (NMSS Spent Fuel Project Office Qualification Journal) has been revised to add additional guidance for qualification board conduct and documentation.

IP 71111.07 (Heat Sink Performance) has been revised to incorporate lessons learned from an ANO inspection regarding Ultimate Heat Sink (UHS) dam integrity (IR 2005008). Inspection of the UHS water reservoir is required every other biennial inspection. Also, other minor editorial changes were made.

IP 71122.01 (Radioactive Gaseous and Liquid Effluent Treatment and Monitoring Systems) has been revised to increase inspection activities as a result of recent groundwater contamination events. Resource estimates have also been increased by four hours to reflect increased inspection activities.

DISTRIBUTION: Standard
