RE: License No. 29-28428-01

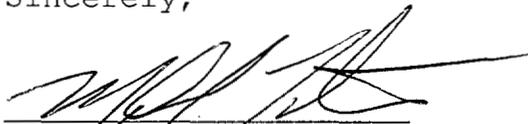

Dear Sir or Madam:

We would like to amend the Materials License at Teaneck Radiology Center, LLC, by making the following changes:

- Add Terrance Lee, M.D. as an authorized user for radioactive materials specified in CFR Part 35.200. Dr. Lee is currently on NRC Materials License No. 29-30214-01. Please see the enclosed credentials.

If you require any additional information regarding this matter, do not hesitate to contact us.

Sincerely,

 Michael Peters, DABR
 Radiation Safety Officer

New Jersey Radioactive Materials License

Records of misadministrations are to include the following information: name of the referring physician, description of the event, the effect on the patient and the action taken to prevent recurrence.

17. The licensee shall not open sealed sources containing radioactive material.
18. Sealed sources shall be tested for leakage and/or contamination at intervals not to exceed six months.
 - A. The test shall be capable of detecting the presence of 0.005 microcuries of removable radioactive material on the test sample. The test sample shall be taken from the sealed source or from the surface of the device in which the sealed source is permanently mounted or stored.
 - B. If the test reveals the presence of 0.005 microcuries of removable contamination, the licensee shall immediately withdraw the sealed source from use and shall cause it to be decontaminated and repaired or to be disposed of in accordance with the Department regulations. Within five days after obtaining results of the test, a report shall be filed with the Department describing the circumstances, the test results and the corrective action taken.
 - C. The sealed sources shall be tested for leakage and/or contamination by appropriately trained personnel.
19. Repair, initial leak tests and disposal of sealed sources containing radioactive material shall be performed only by the manufacturer or by other persons specifically licensed by New Jersey or the Federal Government to perform this service.
20. Radioactive material with a physical half life of less than 300 days may be disposed of as non-radioactive waste provided that (a) the radioactive waste is stored behind adequate shielding to meet the requirements of New Jersey Radiation Code 28-6, (b) the radioactive waste is held for ten half-lives of the longest lived radioisotope to be disposed of, (c) the radioactive waste is monitored with a GM meter prior to disposal to insure background levels, (d) all radiation labels are removed or obliterated and (e) a log shall be maintained to include the results of the radiation survey and date of disposal.
21. The licensee shall make the following items available to their staff:
 - A. Copy of the New Jersey Radiation Protection Code.
 - B. Copy of the New Jersey State Radioactive Material License.
22. The licensee shall post the following items in an area frequented by employees engaged in the use of licensed materials:
 - A. Notice to Employees -- RPP-14.
 - B. Emergency procedures involving major, minor spills including the names and phone numbers of people to contact.
 - C. Appropriate signs and labels in areas and/or containers and equipment in which radiation and/or radioactive material are contained. These postings are to conform to Subchapter 10 of the Code.
23. The following tests shall be performed as a minimum:
 - A. Surveys of:
 1. All radioactive materials received.
 2. All radioactive waste decayed to background levels prior to release.
 3. Controlled areas, where licensed materials are used on days they are used.
 4. Uncontrolled areas, where licensed materials are used on days they are used.
