

Note to file regarding date of next inspection
Abington Memorial Hospital
37-00432-02
03002948

Last inspection was in August 2005, resulting in a clear 591. Inspector set next inspection date for August 2006, with no explanation provided for interval less than the two-year priority code.

I reviewed this with the inspector today. He said he does not recall a specific reason for setting the next inspection at a reduced interval. He suggested setting the next inspection date at August 2007.

We will notify LAT to reset the next inspection date to August 2007.
