Level of Concurrence: Chief, Decommissioning Branch
Division of Waste Management
Office of Nuclear Materials Safety and Safeguards

Recordkeeping Requirements in Accordance with the Retention Periods for Records/Rule: NA

Abstract: 10 CFR Part 62 sets out the information which must be provided to the NRC by any low-level waste generator seeking emergency access to an operating low-level waste disposal facility. The information is required to allow NRC to determine if denial of disposal constitutes a serious and immediate threat to public health and safety or common defense and security. 10 CFR Part 62 also provides that the Commission may grant an exemption from the requirements in this Part upon application of an interested person or upon its own initiative.
