DRS Rk issued and this  
7/30/02  
input was included.

MEMORANDUM TO: Mark Ring, Chief  
Reactor Projects Branch 1  
Division of Reactor Projects

FROM: Kenneth R. Riemer, Chief  
Plant Support Branch  
Division of Reactor Safety

SUBJECT: DRESDEN NUCLEAR POWER STATION  
DRS INPUT TO INTEGRATED REPORT 50-237/02-08(DRP);  
50-249/02-08(DRP)

Attached is the DRS report input for Dresden Nuclear Power Station Inspection Report No. 50-237/02-08(DRP); 50-249/02-08(DRP). This input provides the results of a recent inspection into aspects of the licensee's public radiation safety program. Specifically, the inspection focused on the implementation of the radiological environmental monitoring program, and included a review of the program for the unconditional release of material outside the radiologically controlled area. Additionally, data collection and assessment methods associated with the performance indicators for the occupational and public radiation safety cornerstones were verified for accuracy. I have reviewed this input and have determined it is ready for distribution to the licensee and dissemination to the public.

After your concurrence, please return this hard copy to me, and we will email the electronic version to you.

Attachment: Input to Inspection Report No. 50-237/02-08(DRP);  
50-249/02-08(DRP)
