Maitri

Does DORL have the lead for adding the Tritium issue to the briefing book. If so, please work with the HP Branch on this.

This topic will be added to the oversight hearing book. At the end of the e-mail chain is the briefing summary to Congressional staffers on Braidwood tritium issue.

Over the weekend, one of Dresden's onsite sample results showed a high level to about 500,000 pci/lit (preliminary). Possibility of a new leak is being investigated. Exelon plans to issue a press release later today. RIII is following the issue and is planning an EDO daily update.

Tilda: Mahesh Chawla is the Acting Braidwood PM.
