REVIEW (TAC L31856)

Dear Mr. Link:

In our letter to you dated April 20, 2006, we requested additional information as a result of our technical and site review of the Integrated Safety Analysis (ISA) Summary for your Richland facility. In our efforts to complete and document our review, we find it necessary to revise Question Ch5 and add a new Question E9 as specified in the enclosure hereto. If possible, please include responses to revised Question Ch5 and the new Question E9 with the additional information requested in our April 20, 2006, letter.

Pending timely receipt of the requested additional information, which should answer these questions and those sent previously, we still anticipate completing our review by the end of October 2006. This date could change depending on the findings of our technical review, urgent assignments, or other factors. We will promptly communicate any significant changes to this schedule.

If you have any questions regarding this letter, please contact Fred Burrows (the team leader for the ISA review) at (301) 415-8110, or via e-mail, to [FHB@nrc.gov](mailto:FHB@nrc.gov).
