> Subject: Audit Q & A (Question Numbers AMP-141, 210, 356)

>

> Donnie/Roy,

>

> Attached are the responses to AMP-210 and AMP-356 in an updated version of the reports from the AMP/AMR Audit database. Also included is a revised version of AMP-141. These answers have been reviewed and approved by Technical Lead, Don Warfel.

>

> Regarding AMP-210, please note:

> As pointed out in our response to NRC Question AMP-210, (8a)(1), "The 0.806" minimum average thickness verbally discussed with the Staff during the AMP audit was recorded in location 19A in 1994. Additional reviews after the audit noted that lower minimum average thickness values were recorded at the same location in 1991 (0.803") and in September 1992 (0.800"). However, the three values are within the tolerance of +/- 0.010" discussed with the Staff."

>

> Regarding AMP-141, please note:

> Our response to AMP-141 has been revised to reflect additional information developed during the ongoing preparation of RAI responses.

>

> Please let John Hufnagel or me know if you have any questions.
