Subject: Davis-Besse Nuclear Power Station
Partial Withdrawal of License Amendment Application to Allow Performance
of EDG Load Rejection Testing and 60-Minute Loaded Run to be Performed
On-Line (License Amendment Request (LAR) 03-0015; TAC No. MC8004)

Ladies and Gentlemen:

By letter dated July 27, 2005 (Serial Number 3158), the FirstEnergy Nuclear Operating Company (FENOC) submitted License Amendment Request (LAR) 03-0015, an application for amendment of the Operating License, Appendix A, Technical Specifications (TS) for the Davis-Besse Nuclear Power Station (DBNPS). The proposed amendment would revise TS 3/4.8.1.1, "A. C. Sources - Operating," to adopt a more recent standard for diesel fuel oil testing and remove the restriction that certain surveillance requirements be performed during shutdown.

FENOC requests withdrawal of the portion of LAR 03-0015 that affects TS Surveillance Requirement (SR) 4.8.1.1.2.d. This portion of the change would have allowed Surveillance Requirements (SR) 4.8.1.1.2.d.1 and 4.8.1.1.2.d.3 to be performed on-line. FENOC requests continued processing of the remainder of LAR 03-0015.

The portions of the previously submitted evaluation for LAR 03-0015 related to SR 4.8.1.1.2.d are not applicable to the remaining change. The portions of the previously submitted evaluation related to fuel oil testing are unaffected, including the technical analysis, no significant hazards consideration, and environmental consideration.

Attachment 1, Commitment List, identifies that there are no commitments contained in this letter. If there are any questions or if additional information is required, please contact Mr. Gregory A. Dunn, Manager – FENOC Fleet Licensing, at (330) 315-7243.
