U.S. Nuclear Regulatory Commission
Washington, DC 20555-0001

UN#06-003

Subject: NRC Project No. 746
Early Submittal of Sections of the Combined License Application

Ref. 1: Letter from George Vanderheyden, Constellation Energy, to David B. Mathews, NRC, "Request for Additional Combined Construction and Operating License Pre-application Interaction: Follow-up to January 25, 2006 Meeting," dated February 10, 2006.

By letter dated February 10, 2006 (Ref. 1), UniStar Nuclear informed the NRC, via a letter from Constellation Energy Group (CEG), that as part of its pre-application activities it planned to submit a limited number of sections of the application for a Combined License (i.e., COL) for NRC early review. At our May 2, 2006 meeting UniStar Nuclear specified the COL application (COLA) sections, schedule, and logic for providing these early submittals. This preliminary pre-application plan has been developed to support UniStar Nuclear's aggressive licensing and construction schedule that will place a U.S. Evolutionary Power Reactor (EPR) in operation by 2015. Our current intention is to submit the pre-application material on the following schedule.

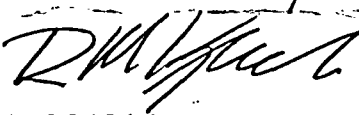

• Quality Assurance	Final Safety Analysis Report (FSAR) Chapter 17	Third Quarter 2006
• Security Plan	FSAR Chapter 13.6	Fourth Quarter 2006
• Emergency Plan	FSAR Chapter 13.3	Fourth Quarter 2006
• Documents that support granting of Limited Work Authorization - 1 (LWA-1)	Environmental Report (ER) Site Redress Plan FSAR Chapter 2 (relevant sections)	Second Quarter 2007
• Documents that support granting of LWA - 2	Supplemental ER FSAR Chapter 3 (relevant sections) Site Redress Plan	Fourth Quarter 2007

As discussed during the May2, 2006 meeting, UniStar Nuclear recognizes that the COLA review process is still evolving and, based on resolution of potential policy issues, submittal schedules may change. Accordingly, UniStar Nuclear committed to future meetings to identify these policy issues and propose possible solutions. As stated during the meeting, we intend to continue to interact with the NRC regarding these early submittals before submitting any of the COLA sections for early review.

Respectfully,
