Health Physicist
Division of Nuclear material Safety

Re: Safety Inspection of 4/ 10-11 / 2006

Dear Mr. Rolph:

Pursuant to your request, enclosed you will find the following materials.

- 1 Original Copy of your inspection report of 4/ 10-11 /2006
- 2 Current copy of our nuclear gauge inventory sheet
- 3 Record of maintenance for each of the eleven gauges that we currently possess along with attached records of leak testing performed on these units to the best of our ability to obtain them.

As we discussed during your visit, we are now maintaining our leak check records in perpetuity, or until the requirements of our license change the duration of record retaining.

Thank you for your help in both clarifying and resolving this issue.

Should you have any questions or desire further information, please contact our office at your convenience.

Very truly yours,
URBAN ENGINEERS of ERIE, INC.
