Subject: Gentlemen,

Gentlemen,

Please find attached to this email a file containing a complete compilation of the Requests for Additional Information (RAIs) generated by SITAG and its consultants concerning the series of Task Reports submitted by NEI to inform the staff working on a new seismic siting and design regulatory guide. The attached compilation includes all the RAIs previously sent, as well as, new ones developed for the S Task Reports and, for completeness, the RAIs developed during the October, 2005 public meeting.

If you have any questions about the content, please call or email me.

The file is in pdf format.

At the May public meeting there was discussion of the potential need for an in-depth rejustification of the definition and derivation of the Cumulative Absolute Velocity, the CAV. The NRC staff took it as an action to review the issue. SITAG has decided that additional justification beyond the RAIs for G1.2 (See RAI 2.2b as a specific example.) is not warranted for this effort.

Best regards,

Dr. Andrew J. Murphy
Chairman of NRC Seismic Issues Technical Advisory Group
