

RIC 2006

Session T1F

License Renewal

Regional Inspections

Patricia Lougheed
Lead License Renewal Inspector
NRC Region III
March 7, 2006

Regional Inspections

- ▶ Inspection Procedure 71002
 - ▶ Performed prior to extended license being granted
 - ▶ Fast paced review of scoping, screening and aging management
 - ▶ Emphasizes in-plant review and walk-downs
 - ▶ Evaluates current performance as measure of future aging management implementation
 - ▶ Increased emphasis on implementation, closer plant is to period of extended operation

Inspection Programs

- ▶ Inspection Procedure 71003
 - ▶ Will be performed “in the vicinity of” period of extended operation – within a year prior to or following the extended license taking effect
 - ▶ Will verify that aging management programs have been implemented as described
 - ▶ Inspections will sample aging management programs
 - ▶ Regional administrator has authority to expand scope or authorize additional inspections
