Based on having lived in this area all my life, in Hobbs and lea county since 1975, and having been employed in a job which kept me outdoors most of the time (25 years); Its my contention that the NRC's environmental assessment of high wind and dust levels in Lea County is based on flawed data.

Its my contention that for the NRC to ignore the high wind/dust problems here in Lea County and to allow the proposed Louisiana Energy Services plant to vent u234, U235, U236, U238 into the air on days when the high winds have the dust levels over the standard set by the Clean Air Act would violate the said act and endanger the health of the civilian population downwind of the plant

Phillip Barr
Lea County
