Glen Ellyn, IL 60137

Dear Ms. Piskura:

Subject: License No. 14-24479-01

Reference: Control No. 88138

On 8 November 1990, we informed your office that several of our utilization log books were inadvertently discarded into a trash container and transferred to an area landfill. Our log books containing information on dosimeter exposure readings, source utilization, and daily safety inspections are not available for three (3) years prior to 22 October 1990. All log books were maintained at Building 3A-100 which contains a CO-60 Source, Inventory No. 1875, with a current activity of approximately 455 curies.

A copy of this letter will be filed with our NRC License and it will be documented in new log books pertaining to the 3A-100 CO-60 Source.

If you have any questions, please contact Nicholas M. Kieler, Environmental Safety & Health Department, phone number (319)753-7434 or 753-7013.

Sincerely,

MASON & HANGER-SILAS MASON CO., INC.
