Subject: Duratek Health and Safety Plans

Craig:

The attached pdf file contains the Health & Safety Plan and the Work Plan for our disposal project. The primary differences from the first plan are

- Two liners and two Type B containers (CNS 1-13G & C).
- Use of a different transfer bell as described in earlier correspondence.
- The increased shielding from that new bell reduces the previous 300 ft restricted area to 50 feet as shown in table 1-1 on page 6.
- Closing the bottom door affixed to the bell eliminates the possibility of control loss of a basket during the transfer phase (page 30).

Three of the 5 Duratek team members from the March will be present for this attempt.

The schedule is still on target as detailed in earlier correspondence noted.

I'm off to deliver a copy of the H&S plan to the Fire Chief. Email or call with any questions, otherwise I'll keep you updated each week via email.
